New the **WHEEL** reinvented!

This NEW ultimate game changing, innovative wheel design brings docking to a whole other level!

- Tapered axle hole allows wheel to “float” and self-adjust an extra 5 degrees each way.
- Shock absorbing patent pending design
- Soft surface and slight arch of the wheel shape guarantees smooth performance.
- Wide wheel provides more weight distribution.

Extremely soft and forgiving wheel material will protect boat hull from scratches and adapt to specific shape of the boat hull including side ribs.
